

EXECoffice

- Create Excel workbooks directly from EXECControl
- Update existing Excel documents from EXECControl
- Export your centers to formatted Excel documents
- Have EXECControl read data from your Word and Excel files without the need to import them
- Create Word documents directly from EXECControl and save, print or send them to PDF
- Much more

The screenshot shows an Excel spreadsheet with a table of items and their quantities. Below the table, there are two charts: 'Aging' (a bar chart showing current and future aging periods) and 'Sales' (a bar chart showing sales data). The spreadsheet also includes a 'Receivables' section with an 'Invoice' table and an 'Order Orders' table.

Microsoft Office is the most used word processing and spreadsheet software in the world. EXECControl's comprehensive and flexible ERP/CRM software solution captures and manages your organization's operational and analytical information. Now these powerful products have a bidirectional linkage, EXECoffice, that gives you the ability to access and move data located in both environments.

Contact one of our consultants to learn more about EXECoffice's capabilities and how this approach can help your business.

“EXECCONTROL DELIVERS DATA WHEREVER NEEDED SO YOU CAN LEVERAGE YOUR EXISTING EXPERTISE.”
